Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claims 6-21 have been canceled.

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-5 and 22-27 in the reply filed on July 13, 2005 is acknowledged. No claims have been withdrawn since claims 6-21 have been canceled.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 22, line 6, the recitation "may be" renders the claim indefinite since it is unclear whether the steering control is gripped and pivoted or not.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3671

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 22-24, 26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Rizzo.

As indicated on the Search Report dated October 28, 2004, note Figs. 1-3 of Rizzo. Note also the disclosure in col. 2, line 19 - column 3, line 31 and in claims 1 and 2 of Rizzo.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rizzo in view of World reference '341.

Rizzo shows the aerator as noted, including a pair of laterally spaced wheels 16 and a steerable front wheel 14.

The claims distinguish over Rizzo in requiring (1) the pair of laterally spaced wheels to be longitudinally offset from a third wheel, the pair of laterally spaced wheels and the third wheel to be arranged in a tricycle configuration on the frame (as required in claim 4); (2) the third wheel to be pivotally carried on the frame, and the handle assembly to be operatively coupled to the third wheel for steering the frame (as required in claim 5); (3) a front wheel to be on the front end of the frame (as required in claim 25).

Art Unit: 3671

World reference '341 shows in Fig. 4 (1) a pair of laterally spaced wheels 21 (page 4, line 10) being longitudinally offset from a third wheel 23, the pair of laterally spaced wheels 21 (page 4, line 10) and the third wheel 23 being arranged in a tricycle configuration (Fig. 4) on the frame 17 (as required in claim 4); (2) the third wheel 23 being pivotally carried on the frame 17, and the handle assembly 25,26 being operatively coupled to the third wheel 23 for steering the frame 17 (as required in claim 5); (3) a front wheel 23 being on the front end (unnumbered) of the frame 17 (as required in claim 25).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have utilized a front wheel as shown in World reference '341 in the manner noted for greater control and flexibility.
